FAQ

1. How do I know which measurement is most important?

For tops, the chest is the most important measurement, while for pants or skirts, waist and hips are critical. For dresses or jumpsuits, all three measurements are usually necessary.

2. What if my measurements fall between two sizes?

If you are between two sizes, consider the garment’s intended fit and fabric. Our Polo fabric is a bit stretchy, so the smaller size might work, or if you prefer a looser fit, go for the larger size. We recommend a bit loose fit for kids.

3. Why does Briz Sports size different than my current size?

Different brands have slightly different sizing standards. What might be a “medium” in one brand could be a “large” in another. Please use our size chart for accurate sizing.

4. My son/daughter is too short/tall and I can’t find a perfect match in your chart. What do I do now?

First of all, go with the chest measurement to find the size and for that size if our chart body length looks over 5CM longer than your kid’s current shirt then you may request for a custom length for your order. Please advise the order organizer with how many CM shorter length you need. Please note if the difference is less than 5 cm then custom length option is not available.

Note: **Briz W** sizes are custom athletic-fit measurements based on body chest in centimeters. These **DO NOT** correspond to retail women’s sizing. Please measure and select the nearest **CM value**.
